September 26, 1979

Douglas Aircraft Company 3855 Lakewood Boulevard Long Beach, CA 90846

Attention: M. J. Veneroso, Dept. C1-725 (52-11)

Gentlemen:

In response to your letter of August 7, we submit the following information:

The Alizerine Ruby Dye, A-3-D-35, is not considered a restricted  $\mathcal{DPM5}33.-6$  article.

The KA and KS Dyes are hazardous materials and the answers to DPM 5354-/
your questions are:

(XS-DPM 5354)

- 1. DOT Proper Shipping Name: Flammable liquid NOS
- 2. DOT Proper Hazard Classification: Flammable Liquid
- 3. Flash Point: 17°F. #4 Ford Cup.
- 4:. The most you can ship by air is 1 quart on a passenger plane and 10 gallons on a cargo plane according to the FAA, Hazardous Materials Specialist. The IATA number is 1113

In our opinion, these colorants are not photochemically reactive.

We appreciate your continued business.

Sincerely

Ms. Gerry Dorsey

Executive Vice President
